

SCL Tubular clip

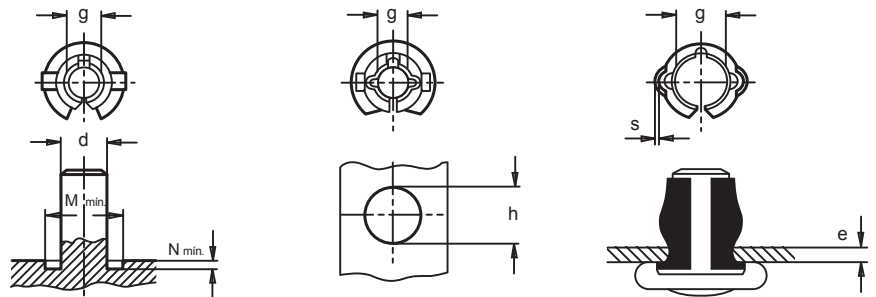

Information

The SCL Tubular Clip is one of a sub-group of fasteners which are used in conjunction with rivets. They can be compared to self-locking nuts for blind assemblies and are used where other fasteners cannot be applied. There are two varieties of SCL:

Self-Locking: The tubular clip is inserted into the corresponding hole in the panel. A rivet is then inserted which causes the clip to open, fixing it into the panel.
Removable: the top of the clip flares out exerting pressure on the rivet.

SCL Tubular clip

Article	Part n° SCL	Fig.	a	b	c	g	s	Box quantity	Outer box quantity
SCL 2645	02282018	B	6	7,1	-	1,8	0,4	1000	16000
SCL 1689	02282106	C	4,7	5,1	0,8	2,65	0,3	1000	32000
SCL 2231	02282114	C	6	6,3	1	3,6	0,4	1000	32000

Material specifications:

Spring Steel
 Quenched and tempered
 HRC. 43+49

Surface treatment:

Anti-rust oil-dipped
